DIVE INFORMATION

Buddies: Randi Eisen

Operator:

Dive Master:

Boat: Sea Hawk, Captain Frank Persico (718) 279-1015

Weight: 20.0

Entry Type:

Weather:

Visibility: 20-40

Dive Type: boat/wreck

Boat Captain:

GPS Coordinates: Unknown, Unknown

NOTES

Fairly rough seas with 3 foot swells, second dive called due to incoming weather. Terrific visibility and conditions on bottom.

"Type: shipwreck, schooner
Depth: 115 ft

The Happy Days appears to be the remains of a wooden schooner. The Happy Days sits in 115 feet of water just east of the G&D wreck. According to Jimmy Fazzolare this wreck consists of scattered wreckage with one mast stump sticking up. Jim reports that the wrecks bell was recovered by one of the Aquarians Club divers. Unfortunately, the bell did not have the wrecks name on it. Visibility, here is often hampered by sediment from a silty bottom. Jim reports that this wreck is one of the best lobster wrecks in the area." -Rich Galiano, njscuba.net
