

Alternate Stringing Method For OMS Bungeed Wings
(Jocassee Rigging)

STEPS

#1 Layout wing on flat surface. Insert bungee cord through both grommets on black strap on outside edge of wing, and tie a knot.

#2 Insert loose end through the accompanying grommet position on the inside of wing

#3 Thread loose end back through adjacent grommet inside of wing.

#4 Thread end through adjacent strap on outside edge of wing, and secure with knot.

#5 Repeat steps 1 – 4, for all 12 straps. You will use only 6 bungees. This is what your wing should look like when complete.

#6 Completed wing (FRONT, SIDE & BACK VIEW)
