

Homicidal Drowning Investigations

**Public Safety Law Enforcement Training
August 22-23, 2007**

“Drowning is the second leading cause of “accidental death” for children in the U.S. and we believe that as many as twenty percent of those drowning incidents involve foul play-and that a large percentage, possibly the vast majority, of those foul play incidents are given accidental death status.”

This course also includes the following:

- Profiling a tub, bucket, or pool-based investigation
 - Post Mortem physiology forensics
 - Investigate vehicular water suicides

Grand Junction, Colorado
