Mark-Lite® LED

MFG P/N 1A-1750-4

Mark-Lite LED

The Mark-Lite LED is the ultimate chemical lightstick replacement. This ultra-small light will give you an amazing 200+ hours of light at full power! The Mark-Lite LED's special high-power lithium battery has a 10-year shelf life and will continue to provide power to -76°F—alkaline batteries fail at -4°F. This is the perfect emergency or backpacking light.

Specifications:

- Lamp: 1 LED
- Lamp Life: 10,000+ hours
- Burn Time: 200+ hours at full power
- Battery: 1 3.6V Lithium
- Power: 2.1 Lumens
- Materials: ABS and LEXAN®
- Weight: 1.7 oz. (48 g)
- CE
- U.S. Patent #6,168,288

Made in the U.S.A.*

*complies with the "Buy American Act". May contain imported components.

Operation of the Mark-Lite:

1. To turn on, hold the flashlight body in one hand and tighten lens clockwise until the light turns on.
2. To turn off, turn lens counterclockwise and **continue to turn it one full turn** after the light is extinguished. This prevents the light from coming on accidentally. Be careful not to unscrew the lens off the O-ring seal. If you do, your light may flood.

If Your Mark-Lite Floods:

1. Remove and discard batteries.
2. Flush flashlight and parts with warm, fresh water.
3. Dry, then check for damage or corrosion.
4. Return to factory or replace damaged parts as necessary.
5. **REPLACE CATALYST!** The hydrogen absorbing catalyst is the small gray cylindrical chip(s) in the area of the reflector, under the bulb base plate. It **must be replaced** before resealing flashlight. Replacement catalyst may be obtained directly from Tektite.

General Flashlight and Battery Information:

Batteries:

For maximum brightness and burn time, we recommend Lithium AA batteries. Install all batteries with the positive (+) end facing up out of the flashlight.

Maintenance:

Occasionally clean and lightly lubricate lens threads and O-rings with silicone grease. Never use aerosol spray lubricants.

Caution:

Remove batteries from flashlight during periods of storage to prevent damage from cell leakage.

Limited Lifetime Warranty:

Tektite guarantees that its products are free from defects in material and workmanship for the normal life of the product. This warranty includes LEDs; and excludes O-rings, Lanyards, Batteries, Bulbs and strobe electronics, which are wear items; these items are covered for 60 days from date of purchase, or their normal service life as stated on the package, whichever comes first. This warranty is to the original owner only, and does not cover damage due to normal wear, abuse, alteration, poor maintenance, accidents, loss or negligence. Our liability is strictly limited to repair or replacement of the product.

To make Warranty effective, the original purchaser must return the damaged unit to Tektite postage paid together WITH PROOF OF PURCHASE AND \$9.00 FOR S+H. ALL APPLICABLE IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND OF FITNESS FOR A PARTICULAR PURPOSE, GIVEN TO YOU BY LAW ARE HEREBY LIMITED IN DURATION TO THE DURATION OF THIS WARRANTY. UNDER NO CIRCUMSTANCES WILL TEKTITE BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES. (Some States do not allow limitations on how long an implied warranty lasts, or the exclusion of incidental or consequential damages, so the above limitations may not apply to you and you may also have other legal rights which vary from State to state beyond the rights created by this Warranty.) The Manufacturer neither assumes nor authorizes any other person to assume for it any other liability than stated herein.
